## EAP650 D30-Outdoor

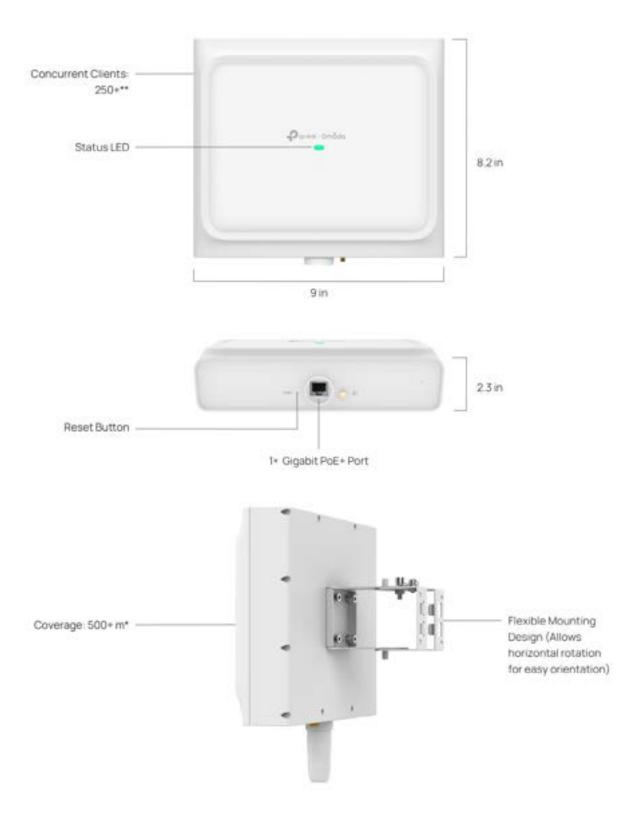

AX3000 Indoor/Outdoor Wi-Fi 6 Access Point

## **Highlights**

- Superior WiFi 6 Speeds: 2402 Mbps on 5 GHz and 574 Mbps on 2.4 GHz.\*
- Directional Ultra-Range Coverage: Equipped with built-in high-gain directional antennas to deliver precise and extended coverage.\*
- Ideal for Warehouses and Outdoor Scenes: Features an IP68 waterproof enclosure with -30°C to +70°C operating range.
- 802.11k/v/r Seamless Roaming: Ensures uninterrupted connectivity for AGVs and handheld scanners.\*
- Flexible Deployment: Supports 802.3at PoE and Omada Mesh technology.
- Centralized Cloud Management: Control everything from a single interface anywhere via the Omada app or Web UI.\*

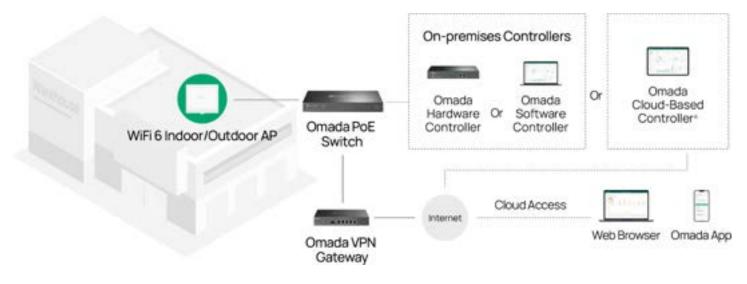

## **Product Pictures**

\* Coverage is calculated based on liaboratory testing. Actual coverage is not guaranteed and will vary as a result of client limitations and environmental factors. \*\* The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.

# **Omada Solution**

Omada's Software Defined Networking (SDN) platform integrates network devices, including access points, switches, and gateways, providing 100% centralized cloud management. Omada creates a highly scalable network—all controlled from a single interface.

# Specifications

| Model       |                                 | EAP650 D30-Outdoor  |  |  |  |
|-------------|---------------------------------|---|--|--|--|
| Name        |                                 | AX3000 Indoor/Outdoor Wi-Fi 6 Access Point  |  |  |  |
|             | LAN Interfaces                  | 1x Gigabit Ethernet Port  |  |  |  |

#### **Disclaimers**

\* Maximum wireless transmission rates are the physical rates derived from IEEE Standard 802.11 specifications. Range, coverage, and maximum quantity of connected devices are based on test results under normal usage conditions. Actual wireless data throughput, wireless coverage, and quantity of connected devices are not guaranteed and will vary as a result of 1) environmental factors, including building materials, physical objects, and obstacles; 2) network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead; and 3) client limitations, including rated performance, location, connection quality, and client condition.

\* Use of WiFi 6 (802.11ax) and its features, including OFDMA, and 1024-QAM, requires clients to support the corresponding features.

\* The actual capacity depends on the wireless environment and client traffic and is generally less than the maximum number of client connections.

\* Omada Mesh, Seamless Roaming, Cloud Access, and Captive Portal require the use of Omada SDN controllers. Go to Omada Mesh Product List to find all the models supported by Omada mesh technology, and refer to the User Guides for Omada SDN Controllers for configuration methods.

\* Protection against lightning and electro-static discharge may be achieved through proper product setup, grounding and cable shielding. Refer to the instruction manual and consult an IT professional to assist with setting up this product.

\* Actual network speed may be limited by the rate of the product's Ethernet WAN or LAN port, the rate supported by the network cable, Internet service provider factors and other environmental conditions.

\* PoE budget calculations are based on laboratory testing. Actual PoE power budget is not guaranteed and will vary as a result of client limitations and environmental factors.

\* MU-MIMO capability requires client devices that also support MU-MIMO.

Some models featured in this guide may be unavailable in your country or region. Visit TP-Link website for local sales information: https://www.tp-link.com/. Specifications are subject to change without notice. © 2025 TP-Link
